AOBOUT

~~W~~elcome and thank you for visiting my website. I ~~launched this website created this social media tool~~ to connect with you and share ~~ing our thoughts of any incredible experiences we had,~~ as I do believe that everyone has wa-orthwhile good experiences to share, and it is good to share to other people. ~~By saying this, I am welcome inviting~~ you to share your thoughts, comments and experiences on this ~~submit your thought or life experiences to posting it in this~~ website.

At this time, I would like to introduce you to my first book, "Alphabet Philosophy." This book is for kid(s) from 4-12 years of age (or kK Kindergarten to grade 6). This is not just a colouring and activity book. ~~What sets this book apart The different with other similar book~~ is that the content was designed contains excellent philosophies to provide give an excellent knowledge and encouragement to help your children as they grow intellectually.

Each letter of the alphabet spells a word imbued with philosophy to inspire your child ~~or children~~ to develop good character during their early growth stage. For their entertainment as they learn, I also provide writing practice and a full page of colouring for each letter of the alphabet. In addition, there are two pledges and two pages of word searches. These features distinguish this book from other colouring and activity vies books.

Comment [SS1]: I don't think it's necessary to say "child and children." Just "child" is enough.
